

Abstract

A child seat (1) for a shopping trolley (22) includes a back rest (7) made of plastic and is arranged on the shopping trolley (22) so as to be pivotable about a horizontal axis (9) and to which at least one seat (6) is slidably or pivotably connected. The back rest (7) includes at least two parts (17, 18) fixedly connected to one another and constructed so that at least one portion (19) of the back rest (7) is formed as a hollow body.
